

4179-123

Section I (Amendments to the Specification)

Please replace original paragraph [0030] with the following replacement paragraph:

[0030] Moreover, an external surface of the outer balloon 19 may preferably be coated, impregnated or otherwise covered with a therapeutic agent, such as an anti-microbial or a hormone, for delivery thereof, or a hemostatic material, such as oxidized cellulose and hemotene, for contact with the inner surface of the body cavity to further assist in controlling bleeding.
